

KOOPERATIVER MODUS

FESTUNG DER TITANEN

Autor: Invoceusse

Source: [Archon Studio Discord](#)

Vor langer Zeit wurde eine mächtige Festung errichtet, um die fantastischen und mörderischen Titanen zu beherbergen. Niemand hat sie je betreten und ist zurückgekehrt, um davon zu berichten. Nun gibt es Gerüchte über den Tod der Wächter und eine unglaubliche Menge an Schätzen, darunter möglicherweise der beste Bogen der Welt. Wenn die Legende der leeren Festung wahr ist, ist es Zeit für Ausgrabungen. Aber zunächst müssen deine Verbündeten und du die in Antagarich verstreuten Schlüssel finden, um das Tor zur Titanenfestung zu öffnen.

SZENARIOLÄNGE

This Scenario is played over 16 Rounds (15 on Impossible difficulty).

VORBEREITUNG DER ABENTEUERKARTE

Nehmt die folgenden Gebiete und platziert sie wie in der Abbildung der Abenteuerkarte gezeigt: (*F* steht für die Fraktionsanzahl):

- $P \times \text{Starting (I) Map Tile}$
- $2P \times \text{Far (II–III) Map Tile}$
- $2P \times \text{Near (IV–V) Map Tile}$
- $(P + 1) \times \text{Center (VI–VII) Map Tile}$

NOTE: If you don't have enough VI–VII Tiles, you can use another Tile near I Tiles. The center of this Tile is the Titans' Stronghold.

SIEGBEDINGUNGEN

Kill all Units in the Titans' Stronghold (the center of Tile VI–VII next to Tiles I).

NIEDERLAGENBEDINGUNGEN

There are undefeated Units left in the Titans' Stronghold at the end of Round 16 (15 on Impossible difficulty).

BESONDERE EREIGNISSE

4th, 8th and 12th Rounds:

- Remove all Black Cubes from every Windmill, Water Wheel, and Mystical Garden on the map.

ADDITIONAL RULES

- Remember: the center of VI–VII Tile next to all I Tiles is the Titans’ Stronghold.
- No one can enter the Titans’ Stronghold until all other VII Fields are flagged by any player.
- After defeating a Level VII Neutral army, instead of resolving the Field, the player chooses an option three times from the following list (an option may be chosen multiple times):
 - ▷ Another player (your choice) gains 5 🍀
 - ▷ Another player (your choice) gains 2 🌸
 - ▷ Another player (your choice) gains 1 🌺Then, flag the VII Field with a Faction Cube. (There is no bonus in solo play!)
- Ignore all yellow borders on Starting Tiles I.
- You can use your build Token to give your resources to another player.
- Two players can use their build Tokens to exchange Artifacts and/or Spells.
- Whenever a player Visits an Obelisk, that player rolls one treasure Die and one resource Die, and resolves one of them.
- When all VII Fields (excluding the Titans’ Stronghold) are flagged, randomly draw and shuffle the specified number (see the next page) of Neutral Unit Cards from each of their corresponding Decks to create a separate Deck of Neutral Units for the Titans’ Stronghold (the Deck of the Titans’ Stronghold is sometimes split in two because certain Scenarios are otherwise impossible to implement with the Cards from certain expansions).
- Any time a Hero enters the Titans’ Stronghold, they draw 5 Cards from the Titans’ Stronghold Deck instead of from the Neutral Unit Card Decks. The Units are placed on the Combat Board (see pa-

ge 29, “Neutral Unit Setup” in the Core Rulebook). Players attempt to defeat the Units they find in the Titans’ Stronghold. Any Neutral Units defeated during Combat in the Titans’ Stronghold are returned to their respective Neutral Unit Decks instead of the Titans’ Stronghold Deck. Any Neutral Units surviving Combat in the Titans’ Stronghold are shuffled back into the Titans’ Stronghold Deck. If there are not enough Unit Cards in this Deck, draw as many Unit Cards as are available and place them on the Combat Board.

- Combat in the Titans’ Stronghold now costs 1 🐎 to extend per Combat Round, just like Combat against non-Azure tier Units.
- Additionally, no player can:
 - ▷ Attack other Heroes.
 - ▷ Capture a Mine or Settlement that is already controlled.
